guideline are evidence-informed and consensus-based (trustworthy based transparent process rather than fully evidence –informed). Important to make this distinction

Discussion around co-creation, while continuing to build resource document and inventory around small set of questions

Highlighted that may be more challenging to capture all evidence in guideline space as so much is produced but not always in public domain

Opportunity to use inventory project to facilitate coordination across synthesizing, digitizing and recommending to create something that is valuable to the greater community

Group to identify when best suited to develop stronger links with Synthesizing working group
