

1. FOLLOW-UP ON ACTION ITEMS

a. *Review previous meeting notes from July 31*

b. *Finding a new time for meetings:*

Doodle poll <https://doodle.com/poll/8um8kwexgcn4tv7t>

- ACTION: Working Group members to fill out the Doodle poll to find a new time, hopefully projected to change for the week of September 7

2. PRESENTATION AT FUTURE PARTNERS MEETING

a. *Tentative date: August 27?*

- *Recommending WG presentation at partners call to be moved to September 10th*

3. REGISTRIES OF GUIDELINES IN DEVELOPMENT

a. *Discussion about registries*

- *Sara shared a short paper summarizing registries of guidelines in development*
 - *Clinical guidelines.gov from Australia (specific to Australia but high quality)!*
 - *guidelineregistry.org (led by Yaolon Chen-, used extensively by medical association of china; 2 guidelines are COVID-specific!)*
 - *Registry based in Germany, highest quality registry, collects information from 150+ guidelines; 14 are COVID-specific and 36 COVID-relevant!*
 - *Registry led by Ukrainian MOH, some in English though mostly in Ukrainian; no COVID entries !*
- *Existing GIN library has 271 guidelines in development registered; no COVID specific guidelines. Sara's summary document also describes GIN's plans for guideline registration, including inviting COVID-specific and COVID-relevant guidelines. Will be open access and include contact information and deadline for contacting. !*
 - *COVID-END's role should be to point to and complement GIN's resources !*
- *Registries of guidelines may be helpful for those that are starting new guidelines, but if a guideline developer realized that there is a guideline produced by an organization, then it would be helpful for those developers to contact guideline groups to avoid duplication of efforts*
- *Currently no registry for HTA reports, though there is interest in EU!*
 - *Planned and ongoing project (POP) reports within EUnetHTA, working to incorporate this into INAHTA database; likely the best tool and will evolve to be even more useful.!*

- ***Sandra suggested bringing Rebecca Morgan and the guideline working group into the conversation***
-

- ***The COMET steering group newest focus in on prevention and once approved, they will launch an online Delphi process (projected to be completed by September) and are keen for COVID-END partners to sign up !***

b. Final comments to 'Resources and tools for guideline developers and decision makers interested in rapid guidance and HTA-IF'
